

Is your business ready for Microsoft Copilot?

Boost productivity, efficiency, and business outcomes

Copilot, Microsoft's AI-powered assistant, integrates into widely used applications to help with anything from data analysis and presentation design, to meeting admin and more. But to get the most from Copilot, it needs to be deployed effectively.

That's where Sharp's Microsoft Copilot Readiness Assessment comes in. It provides a comprehensive view of where your teams could benefit from Copilot at this stage, providing you with the perfect foundations for introducing it successfully.

SHARP
Be Original.

Why choose Sharp's Copilot Readiness Assessment?

Sharp's unique Microsoft Copilot Readiness Assessment service can help your business to deploy Copilot smoothly, efficiently and productively, and ensure that you're able to gain the results you want.

Key components and benefits of the assessment:

Current Environment Review

Sharp investigates your business's technical infrastructure to determine the areas where Copilot stands to have the biggest impact.

User Personas Workshop

Sharp will identify the key user profiles within your business, making it easy to understand the best use cases for each department, as well as how best to train each team accordingly.

Data Review

Sharp conducts a comprehensive review of your data, including its storage locations, security measures, and access permissions. This process is designed to ensure that employees have access only to the data that is pertinent to their roles, preventing unauthorised access to sensitive or confidential information.

Security and Compliance

Sharp analyses your current security architecture to ensure that appropriate and effective data protection measures are put in place and aligned with business goals.

Implementation Recommendations

Sharp can pinpoint additional benefits you may not have considered. By identifying the critical gaps in your business's current technology suite, Sharp can give you expert recommendations on how to improve them.

Are you ready to take the next step in your Copilot journey?

There's no time like the present to start getting your business prepared for Copilot and create a more streamlined, efficient way to work.
